Title Statement

Title: Uniform Crime Reporting Program Data [United States]: Arrests by Age, Sex, and Race, 2000

Alternative Title: ASR, 2000

Identification No.: 03443

Responsibility Statement

Authoring Entity: United States Department of Justice. Federal Bureau of Investigation

Production Statement

Producer: Inter-university Consortium for Political and Social Research

Copyright: Copyright(c) ICPSR 2006

Place of Production: Ann Arbor, MI: Inter-university Consortium for Political and Social Research

Distribution Statement

Distributor: Inter-university Consortium for Political and Social Research

Series Statement

Series Name: Uniform Crime Reporting Program Data [United States] Series

Series Information: Since 1930, the Federal Bureau of Investigation (FBI) has compiled the Uniform Crime Reports (UCR) to serve as periodic nationwide assessments of reported crimes not available elsewhere in the criminal justice system. With the 1977 data, the title was expanded to Uniform Crime Reporting Program Data. Each year, participating law enforcement agencies contribute reports to the FBI either directly or through their state reporting programs. ICPSR archives the UCR data as five separate components: (1) summary data, (2) county-level data, (3) incident-level data (National Incident-Based Reporting System [NIBRS]), (4) hate crime data, and (5) various, mostly nonrecurring, data collections. Summary data are reported in four types of files: (a) Offenses Known and Clearances by Arrest, (b) Property Stolen and Recovered, (c) Supplementary Homicide Reports (SHR), and (d) Police Employee (LEOKA) Data (Law Enforcement Officers Killed or Assaulted). The county-level data provide counts of arrests and offenses aggregated to the county level. County populations are also reported. In the late 1970s, new ways to look at crime were studied. The UCR program was subsequently expanded to capture incident-level data with the implementation of the National Incident-Based Reporting System. The NIBRS data focus on various aspects of a crime incident. The gathering of hate crime data by the UCR program was begun in 1990. Hate crimes are defined as crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity. In September 1994, disabilities, both physical and mental, were added to the list. The fifth component of ICPSR's UCR holdings is comprised of various collections, many of which are nonrecurring and prepared by individual researchers. These collections go beyond the scope of the standard UCR collections provided by the FBI, either by including data for a range of years or by focusing on other aspects of analysis.

Study Scope

Subject Information

Keyword(s): arrests, arson, assault, auto theft, burglary, counties, crime rates, crime reporting, drug abuse, fraud, illegal gambling, larceny, law enforcement, murder, offenses, rape, robbery, sex offenses, Uniform Crime Reports, vandalism, weapons

Topic Classification(s): Social Institutions and Behavior, Crime and the Criminal Justice System

Abstract

These data provide information on the number of arrests reported to the Federal Bureau of Investigation's (FBI) Uniform Crime Reporting (UCR) Program each month by police agencies in the United States. Although not as well known as the "Crimes Known to the Police" data drawn from the Uniform Crime Report's Return A form, the arrest reports by age, sex, and race provide valuable data on 43 offenses including violent, drug, gambling, and larceny crimes.

Summary Data Description

Time Period: 2000

Date(s) of Collection: 2000

Country: United States

Geographic Coverage: United States

Geographic Unit: US states, counties, cities

Unit of Analysis: Arrest counts

Universe: Arrests reported by law enforcement agencies

Kind of Data: Aggregate data

Notes

The data received by ICPSR were originally structured as a hierarchical file containing, per reporting police agency, an agency header record, 1 to 12 monthly header records, and 1 to 43 detail offense records. The detail offense records contained the counts of arrests by age, sex, and race for a particular offense.

ICPSR restructured the original data to a rectangular format. In the rectangular format, a record's contents depends on the types of records that were originally present. If an agency had detail arrest records, then the variables from the agency and monthly header records were copied onto the detail records. If an agency had monthly header records and no detail records, then the variables from the agency header record were copied onto the monthly header records, and the detail arrest variables were coded "Not applicable". Lastly, if an agency only had an agency header record, then it constitutes the record and the variables for the monthly header and detail arrests were coded "Not applicable".

The UCR program is voluntary on the part of police agencies across the country. On occasion, therefore, some agencies may not report arrest data.

Methodology and Processing

Data Collection Methodology

Time Method:	Cross-section
Data Collector:	United States Department of Commerce. Federal Bureau of Investigation
Frequency of Data Collection:	Monthly
Mode of Data Collection:	Mail-in forms
Characteristics of Data Collection Situation:	The data for the Uniform Crime Reports are submitted voluntarily by city, county, and state law enforcement agencies. Some agencies receive forms directly from the FBI and return them directly to the FBI. Many others receive forms from state collecting programs and return the reports to those programs. The state programs, in turn, forward the reports to the FBI. Reports are sent out and collected on a monthly basis.
Control Operations:	Once received, the FBI checks the agencies' reports for completeness and arithmetical accuracy. If an unusual fluctuation is detected in an agency's crime count, the FBI compares those counts with counts from previous reports or compares the frequencies to those of agencies similar to the agency in question. When necessary, law enforcement agencies are contacted to correct or explain the figures.

Data Access

Dataset Availability

Location:	Inter-university Consortium for Political and Social Research
Extent of Collection:	1 data files + machine-readable documentation (PDF) + SAS setup file(s) + SPSS setup file(s) + Stata setup file(s) + SAS transport + SPSS portable + Stata system

Data Use Statement:

Restrictions:	In preparing data for public release, ICPSR performs a number of procedures to ensure that the identity of research subjects cannot be disclosed. Any intentional identification or disclosure of a person or establishment violates the assurances of confidentiality given to the providers of the information. Therefore, users of data obtained from the ICPSR archive and/or any of its special topic archives agree: 1) To use these datasets solely for statistical analysis and reporting of aggregated information, and not for investigation of specific individuals or organizations, except when identification is authorized in writing by ICPSR. 2) To make no use of the identity of any person or establishment discovered inadvertently, and to advise ICPSR of any such discovery. 3) To produce no links among ICPSR datasets or among ICPSR data and other datasets that could identify individuals or organizations.
Citation Requirement:	Publications based on ICPSR data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications.
Deposit Requirement:	To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, users of ICPSR data are requested to send to ICPSR bibliographic citations for each completed manuscript or thesis abstract. Visit the ICPSR Web site for more information on submitting citations.
Conditions:	ICPSR data may not be redistributed or sold to other individuals, institutions, or organizations without the written agreement of ICPSR.
Disclaimer:	The original collector of the data, ICPSR, and the relevant funding agency bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

Data Files Description

File-by-File Description

File Name:	03443-0001-Data.txt
Contents of Files:	<p>The records in the data file contain information regarding aggregate counts of arrests by age-sex and race for a specific agency-month-offense combination. For example, if an agency reports arrests for three separate offenses, murder, rape, and robbery, in each of 12 months, there will be 36 records in the data for that agency. The first record will list arrests for murder in January. The second record will list arrests for rape in January. The third record will list arrests for robbery in January. Correspondingly, the 34th, 35th, and 36th records will list arrests for murder, rape, and robbery respectively in December.</p> <p>Each record details the number of persons arrested by age-sex category and race category by that agency in a month for a specific offense. The race variables are arrest counts by race only. They are not detailed by age or sex.</p> <p>Agencies do not necessarily report arrests in every month, nor do they report all offenses. Consequently, agencies will have different numbers of records in the file.</p>
File Dimensions:	<ul style="list-style-type: none">• No. of Cases: 1,262,746• No. of Variables: 89• Record Length: 414• Records per Case: 1• Overall No. of Records: 1,262,746
Type of File:	ASCII data file
Data Format:	Logical record length
Place of File Production:	Ann Arbor, MI: Inter-university Consortium for Political and Social Research
Extent of Processing Checks:	The data collection was processed according to standard ICPSR processing procedures. The data were checked for illegal or inconsistent code values which, when found, were resolved or recoded to missing data. No consistency checks were performed.
Missing Data:	Users should note that blanks and missing data may have a substantive meaning under the FBI coding scheme. Users should refer to the documentation for explanation of individual variables.

Version Statement

Version:	Second ICPSR Version
Version Responsibility:	Inter-university Consortium for Political and Social Research

Notes

ADJUSTMENTS

In tabulating arrest counts, an agency may find that totals for past months require adjustment due to developments in the investigation or other handling of the matter. By adjusting counts from one month to another it is possible to create a negative count for a given month.

- Study 03443 -

DETERMINING ARREST COUNTS

The number of records listed in the data file is NOT the number of arrests reported for that year. Each record lists counts of arrests for a particular agency, month, and offense. Determining total arrests is a two step process. First, it is necessary to sum across the detail categories of age, sex, and or race for each record. This gives total arrests for that agency-month- offense. Then, the aggregate total across all records must be calculated. This gives total arrests.

Below is an example of SPSS code that will compute total homicide arrests by state. Note that arrest totals may differ depending on whether they are calculated using age-sex or race. The differences should be small, and they are due to incomplete information on some records.

Published arrest numbers will not necessarily agree with those calculated directly from the data. Published numbers are often prepared before the most complete arrest information has been made available by reporting agencies. Consequently, they may be based on estimated or incomplete data.

* READ THE ARRESTS DATA FILE SAVED AS AN SPSS SYSTEM FILE.

get file = "arrests.sav".

* SELECT ARRESTS FOR HOMICIDE.

select if (offense eq `01A').

* COMPUTE THE SUMS ACROSS VARIABLES FOR EACH RECORD.

* PREFIX rt MEANS RECORD TOTAL.

* COMPUTE RECORD TOTAL FOR ALL MALES AND FEMALES.

compute rtsex=sum(m0_9 to f65).

* COMPUTE RECORD TOTALS FOR RACE.

compute rtrace=sum(aw to jn).

* COMPUTE STATE TOTALS (SUMS ACROSS RECORDS).

aggregate outfile = *

/presorted

/break=state

/gtsex = sum(rtsex) /gtrace = sum(rtrace) .

* LIST THE RESULTS.

list vars=all.
